Fonts

The default font family is “IBM Plex” and should be used where available.

- For prose text displayed on screens, use the “IBM Plex Sans” variant.
- For very size-constrained text, use the “IBM Plex Sans Condensed” variant.
- For code, use the “IBM Plex Mono” variant.
- For printed text, use the “IBM Plex Serif” variant.

Prefer font variants (like **Bold**, *Light*, *Italic*) over rendering effects.

For readability, **bold** type should be preferred over *italics* for emphasis.

Prefer a font size of 16px for on-screen text.

Colors

- #6800D0 ■ — The **primary color** is a deep purple.
- #AA55FF ■ — The **accent color** is a lighter purple.
- #D3C8DD ■ — The **light color** is a very light purple.
- #F8F8F8 □ — The **background color** is a grayish white.
- #000000 ■ — The **text color** is a pitch-black.
- #FFFFFF □ — The **white color** is a bright white.
